

AiKIYOU stimulo

ACTIVITY FOOD CENTER

Enables the cat to fulfill its natural need to search for food by finding its meal in the various tubes while having fun!

It's smart to be
healthy!

Designed for all cat races,
the Stimulo presents several
unique benefits :

- Slows down ingestion
- Helps weight control
- Satisfies his need for hunt and play

ADVANTAGES FOR A HEALTHY CAT

Stimulates the intellect and entertains the animal during its meal

Since the problem solving is encouraged by a reward, the activity gets more motivating and stimulating for the cat. The intellectual activity occupies the cat while helping to prevent behavior problems linked to boredom.

Helps reduce digestive problems

Because of its numerous tubes and the underlying active search for food, the animal eats slower, contributing to a better digestion.

Helps prevent weight problems

Since the animal eats slower, it feels satiety, contributing to a reduction of the quantity of ingested food.

Helps to maintain a healthy mental balance

Satisfies its need for hunt and play which helps lower stress and anxiety. The positive reinforcement your cat will get from successfully reaching his food will make the Stimulo a motivating way to eat and will contribute to a regular usage.

Helps to stimulate the cats with reduced motivity

Older or arthritis suffering cats or cats that underwent a recent surgery cannot spend their physical energy as normal. The Stimulo offers a activity to stimulate their intellect and to spend part of their excess energy.

Helps to bring back interest for food

Motivates cats that do not feed enough or have lost interest in food providing them with a new challenge of search and mental stimulation.

Product features

- Durable food grade plastic
- Graduated tubes to mesure food quantity
- Anti-slip base
- Individual packaging
- Each master contains 6 individually packaged bowl
